Education

Thadomal Shahani Engineering College –(CGPA - 8.71)

Bachelor of Engineering in Computer Science and Engineering

Aug 2023 – Present

Mumbai, MH

Experience

La'Mina Pvt Ltd

May 2025 – Jul 2025

Web Development & Operations Intern

Mumbai, MH

- **Improved client visibility by 20%** by assisting in **creating a business website** using Justdial's tools.
- Supported daily operations by following up with clients and generating leads, contributing to a **15% increase** in inquiries.

TSEC Devs Club

May 2024 – Jun 2025

Design Head

Mumbai, MH

- **Improved app adoption by 35%** by leading a **UI/UX redesign** of the club's mobile app, streamlining navigation and modernizing the interface.
- **Increased social media engagement by 43%** through **managing digital strategy**, producing visuals that strengthened brand visibility and online presence

TSEC Codecell

May 2024 – Jun 2025

Junior Committee Member

Mumbai, MH

- Coordinated TSEC's flagship hackathon, **TSEC Hacks**, **attracting over 300 participants** and fostering innovation through competitive coding and collaborative problem-solving.
- Developed a dynamic leaderboard application **enabling real-time score updates** for more than 300 participants integrated into the official web application of the club.

Personal Projects

Medivac – Family Health Web-App | React, Node.js, Express, MongoDB, Tailwind CSS

Jun 2025

- Developed a **secure health dashboard** consolidating family medical data, **enabling real-time BP and glucose tracking**; **improved health data accessibility by 40%**.
- Implemented a modular, mobile-friendly design with Tailwind CSS, integrating animations and interactive UI components. Optimized **deployment with Vercel** for hosting and streamlined performance.

MPR StatsCric – IPL Match Statistics & Player Comparison Platform | React, Tailwind CSS, Recharts

Feb 2025

- Developed a dynamic IPL match statistics platform using **React** and **Tailwind CSS**, integrating real-time ball-by-ball data **via a REST API**. Designed an interactive table with **graph-based visualizations (Recharts)** for in-depth performance insights, with a dark-themed UI for enhanced readability.
- Implemented a player comparison feature with fixed player IDs, allowing direct performance analysis without unnecessary API calls. Added filters for past and upcoming matches, **mini-scrollbar navigation**, and **team-based filtering** for an **optimized user experience**.

Technical Skills

Languages: C++, Java, Python, JavaScript

Core Competencies: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Web Development: React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, Vercel

Methodologies: Agile, CI/CD (basic), Debugging, Testing

Achievements

HackerRank:

- **Gold Badge Member in Problem Solving on HackerRank**

Hackathons:

- **Winner – Digitale Digital Marketing Hackathon:**- Developed an AI-powered marketing strategy with automated social media campaigns, optimizing engagement and ad performance.
